

TalentMatch AI

Intelligent Recruitment Assistant

1. System Overview

TalentMatch AI is an advanced recruitment assistance system that helps HR teams identify optimal candidates by analyzing job applications, resumes, and historical hiring data. The system uses machine learning to match candidate profiles against job requirements and predict hiring success.

System Name	TalentMatch AI - Recruitment Assistant
Version	2.1.0
Provider	SAP SuccessFactors
Department	Human Resources
Business Unit	Corporate Services
Lifecycle Stage	Production

2. Intended Purpose

The system is designed to:

- * Automatically parse and extract structured data from resumes and CVs
- * Match candidate qualifications against job requirements using semantic analysis
- * Rank applicants based on skills match, experience relevance, and cultural fit indicators
- * Generate shortlists of top candidates for recruiter review
- * Provide explainable recommendations with highlighted matching criteria

3. Technical Architecture

Base Model	Claude 3.5 Sonnet (Anthropic)
Fine-tuning	Custom training on 50,000 successful placements
Training Compute	2.4 x 10 ²³ FLOPs
Inference Endpoint	https://talentmatch.corp.example.com/api

4. EU AI Act Classification

This system falls under High-Risk classification per EU AI Act Article 6(2) and Annex III, Area 4(a) - Employment, workers management and access to self-employment.

Risk Category	High-Risk (Annex III)
Annex III Area	4(a) - Recruitment and selection
Is GPAI	No - Domain-specific application

Is Chatbot	No
Generates Synthetic Content	No
Biometric Processing	No
Critical Infrastructure	No

5. Human Oversight

All AI-generated candidate rankings require human review before hiring decisions. The system is a decision-support tool, not an autonomous decision-maker.

6. Contacts

Business Owner	Maria Schmidt (HR Director)
Technical Owner	Thomas Weber (AI Engineering Lead)
